

# Virtual Presentation AV & Staging

## General Information >>

- For all of John Foley's Virtual Zoom Presentations, Team Foley's internal AV Team (JFCC) controls the presentation from start to end. If you have a specific request to use a platform other than Zoom with JFCC controlling the presentation, please contact Rob Stone, Executive Producer, John Foley, Inc.
- We can accommodate your needs or request to use another platform or AV team.
- We will need to schedule a virtual tech rehearsal at least one week in advance to review the show flow, timings, and work out any remaining logistics. The tech rehearsal will be between Rob Stone and anyone on your client technical production team.
- John Foley's presentation consists of a spoken message, a set of digital slides, and approximately four video clips.
- The videos and slides he uses are in Apple Keynote.
- The Presentation is presented in 16:9 aspect ratio.
